Mask Guidelines for Public Events

*Public Events includes workshops and volunteer shifts.*

Recently, the CDC has announced that fully vaccinated individuals can return to normal activities without a mask, except where required by federal, state, local, tribal, or territorial laws, rules, and regulations, including local business and workplace guidance. While we are thrilled to return to in-person events and a sense of normalcy, we must still be mindful of the vulnerable members of our community and ensure we are creating a space that is safe for all. We ask that all participants at our events are honest about their vaccination status and potential covid exposure and follow the guidelines outlined below.

- Fully vaccinated individuals may remove masks during outdoor events if they wish.
- We request that individuals who are not fully vaccinated keep their masks on during indoor and outdoor events.
- We encourage all people, regardless of vaccination status, to continue to practice physical distancing at public events.

According to the CDC, an individual is fully vaccinated “2 weeks after their second dose in a 2-dose series, such as the Pfizer or Moderna vaccines, or 2 weeks after a single-dose vaccine, such as Johnson & Johnson’s Janssen vaccine.”

We also recognize that there are many vaccinated people who will continue to wear masks for various reasons and we are respectful of that decision. No one will be expected to remove their mask unless they are comfortable doing so.
